

## **Radiation Protection Program Management**

**Date:** June 12, 2020, 13:00-15:00 EDT

**Instructor:** Joe Cortese, KRM/CBCIT

---

### **Course Outline**

The management of a radiation protection program can be a challenge for many RSOs. It is important to meet best practice standards, stay ahead of regulatory changes, share lessons learned from other licensees, and understand how the regulators are interpreting and enforcing the regulations. This PDC will provide a practical look at managing a radiation protection program and ensuring regulatory compliance of CNSC licensees in Educational, Medical, Industrial and Laboratory settings.

### **Learning Outcomes:**

By the end of this PDC, the participants will be able to:

- UNDERSTAND the regulatory expectations from the CNSC
- CREATE an effective auditing tool
- PERFORM internal audits
- PREPARE for an inspection
- EVALUATE the efficacy of the current radiation program
- FORMULATE a one, three and 5 year plan to maintain a radiation protection program

### **Lesson Plan**

<b>Topic #</b>	<b>Topic</b>
<b>1</b>	Introduction
<b>2</b>	Regulatory Expectations
<b>3</b>	Creating an Auditing Tool
<b>4</b>	Performing Audits
<b>5</b>	Preparing for an Inspection
<b>6</b>	Setting Goals for the Radiation Protection Program
<b>7</b>	Wrap-up
